Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings were received on 01/26/04. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 27 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 10-198043.

JP 10-198043 discloses a card printing system, comprising:

a cartridge sub-assembly (67) , wherein said cartridge sub-assembly encloses a plurality of cards (37), wherein said plurality of cards have been previously plied with a plurality of photosensitive microcapsules; and

a printer sub-assembly, wherein said printer sub-assembly interfaces with said cartridge sub-assembly to obtain one of said plurality of cards, wherein said printer sub- assembly forms a latent image upon the photosensitive microcapsules of the obtained card, and wherein said printer sub-assembly develops said latent image by applying mechanical pressure to said photosensitive microcapsules with a single developer roll (46).

Allowable Subject Matter

4. Claims 1-26 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The claims are allowable over art of record, in particular

Art Unit: 2861

JP 10-198043, at least for the recitation of a developer array used for applying pressure points to the latent image for developing the latent image. As stated by applicant in the specification, utilizing a scanning ball array or a set of pressure rollers significantly shortens the developing time from that of prior art printing systems. Specifically, the entire card 152 can be developed in one or two passes of the developer array 164 instead of requiring over 300 passes as an individual scanning ball of previous inventions required.
